## OBJECTIVE

---

Motivated Full-Stack Developer skilled in ReactJS and MERN stack, seeking to leverage my expertise to drive innovation and contribute to your company's growth.

## EXPERIENCE

---

**React JS Developer Intern**  
Infyni

Nov 2023 - July 2024  
*Gurgaon, Hararyana*

- As a React JS Developer Intern, achieved 25% growth for Performance in Browsers through adept utilization of Tailwind CSS, TypeScript and NextJS skills in developing responsive and user-friendly web interfaces.
- Led the optimization of component rendering in our React application, which led to a 30% improvement in overall performance..
- Developed a platform that helps users buy better courses and gives teachers a better opportunity to earn extra money by using their skills and putting their courses on that platform..

## PROJECTS

---

**LMS** library management app with real-time admin dashboard updates. Implemented **role-based access control** for Users, Librarians, and Admins, each with protected routes and specific features. Future plans include adding an overdue flow with a payment system and a cron job for automating updates.. [\(Link\)](#)

**Business Logs.** Built a tool to store daily logs of selling products and daily expenses for product selling vendors by using ReactJS, NodeJS, ExpressJS, and MongoDB.and for authorization using concept of JSON Web Token . It has an expense tracker, which visually shows data in three divisions using charts. [\(Link\)](#)
